***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to a system and method for receiving a request for weather content from each user client at predetermined time intervals, classified in class 709, subclass 225.
  - II. Claims 20-57, drawn to a system and method for generating a thread for each command in a command list, classified in class 718, subclass 100.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as in a system lacking the method for generating a thread for each command in a command list, particulars. See MPEP § 806.05(d).
3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:
  - (a) the Group I search (claims 1-19) would require use of search **Class 709**,

**subclass 225** (not require for the invention II).

(b) the Group II search (claims 20-57) would require use of search **Class 718**,  
**subclass 100** (not require for the invention I).
